ALTERNATIVE ZA INDUKTIVNU PETLJU

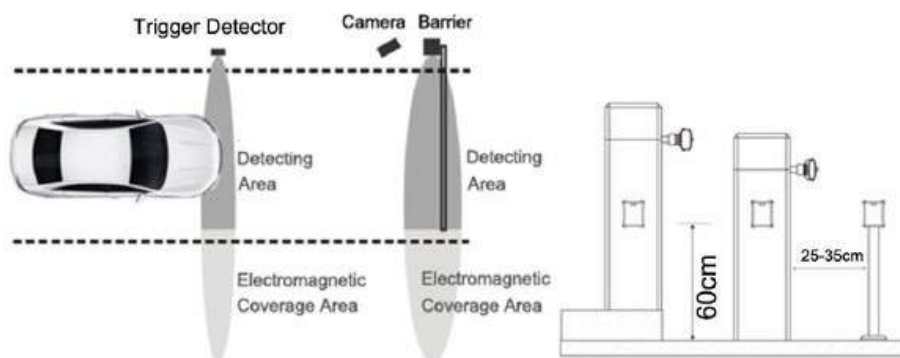

PART No: IDAL-VBR20 | Radar Detector

PART No: IDAL-VBR10 | Radar Detector

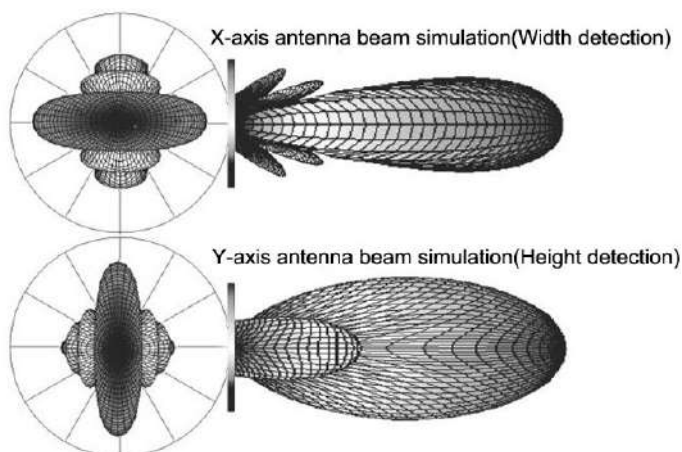

Nije potrebno prosecanje asfalta, pogodan za sve vrste saobraćajnica

BARRIER RADAR DETECTOR

SAFE CONVENIENT

- Input Voltage: DC12V 150mA
- Working Frequency: 24-24.5GHz
- Modulation Mode: FMCW
- Sending Power: 10-15dBm
- Horizontal Beam : <30°;
- Vertical Beam: <17°
- Detection Distance: 1-6 meters, ± 0.1 meters
- Human Detection Width: about 1.5 meters (center area)
- Working Temperature: -40°C~+85°C
- Protection Level: IP67

Are you still troubled to install loop detector and loops?

- Cutting ground--Waste time and not good looking;
- Complex wiring--Messy and Difficult;
- Mud road--Cannot fix the loop;
- Cannot detect big truck, trailer or other vehicles with high-bed.

Why choose barrier radar detector?

- Can replace loop detector completely; no wiring layout, save time and cost.
- Easy installation; Easy parameters setting; Adjustable distance from 1 to 6m.
- Work in range of 24-24.5Ghz without effects from any climatic environment.
- Can effectively distinguish vehicles and humans to avoid any hitting.
- Can be used for trigger detection, e.g. trigger camera to capture the picture.
- Can be used to trigger the alarm in the warning zone.
- Can record the traffic and no data is lost when power is off.
