# VALIDATOR BARCODE PAPIRNIH I RFID KARATA
"NA UVLAČENJE" SA MOTOROM (ISO CR80)

General information

AICC-200 card collecting machine is made of high-intensity and anticorrosive materials according to industry-standard design and production. This machine is aimed at the automatic tellers specifically for performance management system. This machine has the reader antenna and card recycling and recovery of overtime card functions, to prevent misuse with the card function.

1.2. Functions

1) When jam occurs, can choose overtime recycling and overtime not recycling.
2) When jams, can choose withdraw the card forcibly of reject the card.
3) Can choose overtime withdrawal card or overtime not withdrawal card.
4) Can choose time of pushing overtime card
5) Function of preventing misuse, when the first card is at the completion of action, the second card is not acceptable;
6) Can provide PC with enable and whether there are barrier signals;
7) Can receive the order of valid, invalid from PC
8) Sound and light alarm when errors.
1.3. Card material: Paper and polyester card
1.4. Net weight: About 0.7kg
1.5. Speed: About 2 seconds
1.6. Direct current characteristic
Voltage: 24V DC+/- 10%
Working current: peak: 2.2amp
Static current: 0.1amp
1.7. Environment: Temperature: -40℃ to 85℃ (industrial degree)
Relative humidity: 30-90%
